ABSTRACT

Data on earned degrees conferred in the United States from July 1977 through June 1978 are presented, based on results of the Higher Education General Information Survey (HEGIS) entitled "Degrees and Other Formal Awards Conferred." Data on baccalaureate and higher degrees are presented in summary and detailed tables, which show the numbers of degrees granted by level of degree, institutional control and level, sex of recipient, state, and discipline division and specialty. Among the findings are the following: the total number of bachelor's, first-professional, master's, and doctor's degrees conferred by institutions of higher education in 1977-78 showed a decrease over the previous year's total by 2,356; the effect of a decrease in men was largely balanced by an increase in women receiving degrees; the largest increase in the number of degrees awarded to women since 1973-74 occurred for the first-professional degrees, but women were still only approaching parity with men at the bachelor's and master's levels; the percent of degrees conferred by publicly controlled institutions decreased slightly for two degree levels; business and management, education, and the social sciences were the disciplines with the largest number of bachelor's degrees; education, business and management, and public affairs and services were the disciplines with the largest number of master's degrees; and education, social sciences, and biological sciences were the disciplines with the largest number of doctoral degrees. Additionally, degree trends from 1968 through 1978 are analyzed. A sample survey form is appended. (SW)

National Center for Education Statistics

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

Data on earned degrees conferred in the United States are presented in this publication. The data are collected from one survey instrument ("Degrees and Other Formal Awards Conferred," covering the period July 1, 1977, through June 30, 1978 from the 13th annual Higher Education General Information Survey (HEGIS) conducted by the National Center for Education Statistics (NCES).

Data on baccalaureate and higher degrees are presented in summary and detailed tables, which show the numbers of degrees granted by level of degree, institutional control and level, sex of recipient, State, and discipline division and specialty.

Cooperation of college and university officials made possible a response rate of 100 percent for all institutional units operating at the time of the survey. The continued efforts and interest of the survey respondents and the State coordinators are deeply appreciated.

Paul F. Mertins, Chief
University and College Surveys
and Studies Branch

Majorie O. Chandler, Acting Director
Division of Postsecondary and
Vocational Education Statistics

May 1980

Acknowledgments

Reports based on various portions of the Higher Education General Information Survey (HEGIS) were made possible by the cooperative endeavors of many individuals in the National Center for Education Statistics (NCES). For the present report, the following individuals made contributions of particular note: Lillian Beander who provided secretarial assistance and service; Thomas Hill, writer/editor, who designed the format and edited the report; and Phil Carr, graphics artist, who designed the cover.

How to Obtain More Information

Information about the Center's statistical program and a catalog of NCES publications may be obtained from the Statistical Information Office, National Center for Education Statistics, (Presidential Building), 400 Maryland Avenue, SW., Washington, D.C. 20202, telephone (301) 436-7900.

Inquiries for survey forms and for related computer products, including computer tapes, online access to data, printouts, and microfiche, should be directed to Data Systems Branch, National Center for Education Statistics, (Presidential Building), 400 Maryland Avenue, SW., Washington, D.C. 20202, telephone (301) 436-7944.

Highlights

1. The total number of bachelor's and higher degrees conferred in 1977-78 (1,342,137), was a slight decrease from the previous year's total 1,344,493. The relative changes, by level of degree and by sex, from 1976-77 to 1977-78 were:

Level of degree	Percent change	
	Men	Women
All levels	-2.2	2.3
Bachelor's	-1.6	2.3
First-professional	-0.2	19.0
Master's	-3.9	0.7
Doctor's	-5.9	4.9

Women showed increases at all levels—the largest (19.0 percent) was for first-professional degrees. Men earned 5.9 percent fewer doctor's degrees in 1977-78 than they earned the previous year. This was the largest decline among any category of degrees for 1977-78.

2. The percent of bachelor's and higher degrees awarded to women continued to increase within each level of degree:

Level of degree	Women as a percent of total bachelor's and higher degrees	
	1976-77	1977-78
All levels	45	46
Bachelor's	46	47
First-professional	19	22
Master's	47	48
Doctor's	24	26

3. The percent of bachelor's and higher degrees conferred by publicly controlled institutional units decreased for two degree levels, but by only one percentage point for each.

Level of degree	*Publicly* controlled as percent of total bachelor's and higher degrees	
	1976-77	1977-78
All levels	66	66
Bachelor's	69	68
First-professional	41	41
Master's	66	65
Doctor's	64	64

4. The three disciplines with the largest number of bachelor's degrees awarded in 1977-78 were:

Discipline division	Number	Percent of total bachelor's degrees
Business and management	163,274	18
Education	137,742	15
Social sciences	114,184	12

5. As in previous years, the three discipline divisions with the largest number of master's degrees conferred in 1977-78 were:

Discipline division	Number	Percent of total master's degrees
Education	118,957	38
Business and management	48,661	16
Public affairs and services	20,191	6

6. The three discipline divisions with the largest number of doctor's degrees in 1977-78 were:

Discipline division	Number	Percent of total doctor's degrees
Education	7,586	24
Social sciences	3,583	11
Biological sciences	3,313	10

Purpose Of The Survey

Earned Degrees Conferred presents the distribution of all degrees (except honorary) granted by all institutions in the aggregate United States identified as degree granting by the *Education Directory, Colleges and Universities* for a specific academic year. Primarily, this information provides a means for reporting the trained manpower pool in discipline specialties, by degree level and sex, and for ten selected professions. Beyond this, the data fulfill several needs of various State and Federal legislative and executive agencies. Other groups that find this information valuable include discipline-oriented professional associations, accrediting bodies, government agencies that fund specific disciplines, researchers and planners in postsecondary education, and employers.

This edition of *Earned Degrees Conferred* represents the 13th year in the HEGIS survey series and is the 8th report to use the taxonomy adopted in 1970-71 for the 6th HEGIS. Thus, all data for the survey years 1970-71 through 1977-78 are directly comparable and applicable to studies of (1) trends in the number of degrees granted in the discipline divisions and specialties, (2) distributions by sex, State, or other area, and (3) distributions by institutional control and level.

Survey Organization And Methodology

Degree Definitions

The survey requests data for higher education degrees which are defined as follows:

Bachelor's—requires successful completion of at least 4 but not more than 5 years of academic work beyond high school. Includes degrees conferred in cooperative work-study plans which provide for alternate class attendance and employment in business, industry, or government.

Master's—requires successful completion of at least 1 year and sometimes 2 years of work beyond the bachelor's degree. Includes the degree of Education Specialist.

Doctor's—includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and Ph.D. degrees in any field.

Other Degree or Certificate—requires completion of a program intermediate between the master's and doctor's degrees which is recognized by the awarding of a degree or certificate.

First-Professional Degree—a degree that (a) signifies completion of the academic requirements to begin practice in the profession, (b) is based on a program which requires at least 2 years of college work prior to entrance, and (c) requires a total of at least 6 academic years of college work, including prior required college work plus the length of the professional curriculum.

Survey Universe

This report is based on data furnished by 1,882 institutional units. These constitute all of the institutional units in the National Center for Education Statistics' universe that could be identified as offering

bachelor's or higher degrees during the period July 1, 1977 to June 30, 1978. The survey universe is based on the list of institutional units included in the *Education Directory, Colleges and Universities*, 1976-77 with such changes as were known to NCES in fall 1977. Table A shows the number of institutional units included in this survey, by control and level.

by control and level.

Table A.— Number of institutional units included in the 1977-78 survey of earned degrees, by control and level

Level of institutional unit	Total	Control	
		Public	Private
All institutional units	1,882	559	1,323
Universities	161	96	65
Other 4-year	1,721	463	1,258

In addition to these 1,882 institutional units that granted degrees, there were 53 other units that, although offering instruction at the bachelor's or higher levels, did not grant degrees. Some were undergraduate institutions that did not confer bachelor's degrees, but gave diplomas, certificates of completion, or similar awards; others were graduate institutions that did not confer graduate degrees, (in some instances, such degrees were conferred by cooperating institutions).

Major Classifications Of Data

Type of Control—Institutional units were identified as "public" or "private" according to their classification in the *Education Directory*.

Level of Institution—Selected tables in the report group institutional units into two categories: "universities" and "other 4-year institutions." Classified as universities are units that give considerable stress to graduate instruction, confer advanced as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other units offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year" category.

Discipline Divisions and Specialties (major fields of study)—The classification of discipline divisions and specialties relies on *A Taxonomy of Instructional Programs in Higher Education*.* This was adopted by HEGIS in 1970 and is maintained to provide comparability of data on a continuing basis.

Data Collection

A copy of the survey form and accompanying instructions and definitions (see Appendix) was addressed to the president of each institutional unit listed in the survey universe or, in more than one-half of the States, to a State coordinator who supplied the data from information submitted by the institutional units or coordinated the data collection with all or selected institutional units in the State. Follow-up letters and phone calls were made to State coordinators or institutional officials who had not reported the data within a reasonable period of time after the due date of August 15, 1978.

Data Verification

Three methods were utilized to verify the reasonableness of data submitted by each institutional unit:

1. A computer check providing a field-by-field comparison with the data submitted for the previous year was made to determine whether the data varied by more than a predetermined percentage from the previous year's submission. The acceptable differences were based on the order of magnitude of the data field sizes: the greater the number of degrees, the lower the percentage of difference permitted.

2. Survey forms containing data items rejected by the computer check were examined visually by survey personnel to determine whether footnotes, explanatory notes, or readily recognizable human errors accounted for the apparent discrepancies. Where necessary, catalogs of the institutions were consulted for institutional offerings.

3. Finally, the remaining discrepancies were resolved by correspondence or telephone contact with State coordinators and institutional representatives.

Internal checks for consistency included the checking of accumulated totals against subtotals obtained from appropriate subsets of the data.

*U.S. Department of Health, Education, and Welfare, Office of Education, National Center for Education Statistics. *A Taxonomy of Instructional Programs in Higher Education*, by Robert A. Huff and Marjorie O. Chandler, OE50064-70. Washington, D.C.: U.S. Government Printing Office, 1970.

Current Data And Recent Trends

This section of the report focuses on some of the areas of change as well as some of the areas of stability with reference to the number of earned degrees conferred by institutions of higher education in the aggregate United States in the academic year 1977-78.

The total number of bachelor's, first-professional, master's, and doctor's degrees conferred by institutions of higher education in the aggregate United States in 1977-78 showed a decrease over the previous year's total by 2,356 (-0.2). The effect of a decrease in men was largely balanced by an increase in women receiving degrees (see tables 1 and B). Table 1 also shows the

Table B.-- Percent change in number of degrees conferred by institutions of higher education, by sex of recipient and level of degree: Aggregate United States, from 1976-77 to 1977-78

Level of degree	Percent change in number of degrees conferred, 1976-77 to 1977-78		
	Total	Men	Women
All levels	-0.2	-2.2	2.3
Bachelor's	0.2	-1.6	2.3
First-professional	3.4	-0.2	19.0
Master's	-1.7	-3.9	0.7
Doctor's	-3.3	-5.9	4.9

number and percent change in these degrees conferred, by level of degree and sex of recipient, from 1973-74 through 1977-78. The decreases noted for men, although quite large, were almost entirely compensated by proportionate increases in women. Chart 1 shows the number of degrees conferred from 1973-74 through 1977-78 by level of degree.

Chart 1.--Number of degrees conferred, by level of degree, 1973-74 to 1977-78

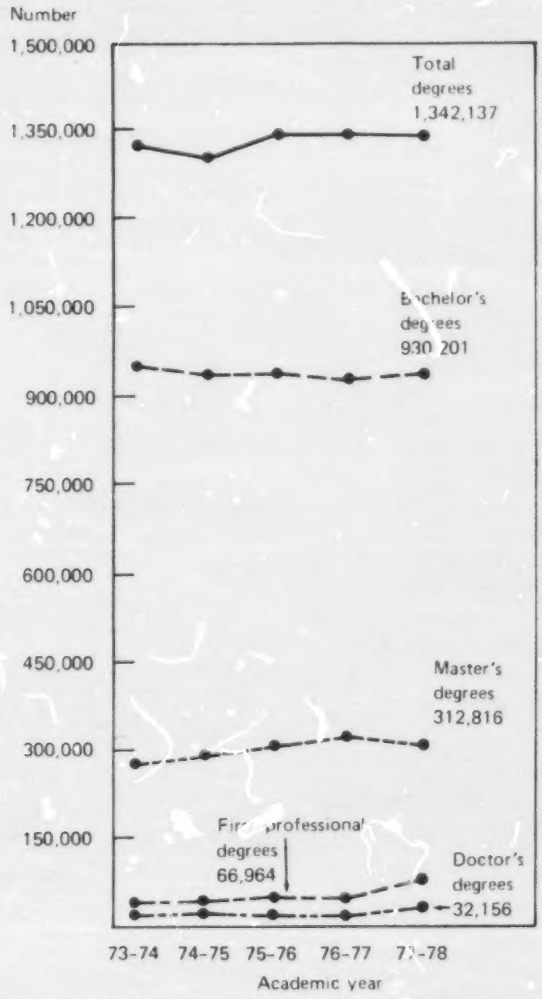

Chart 2.--Percent change in number of degrees conferred, by sex of recipient and level of degree, from 1973-74 to 1977-78

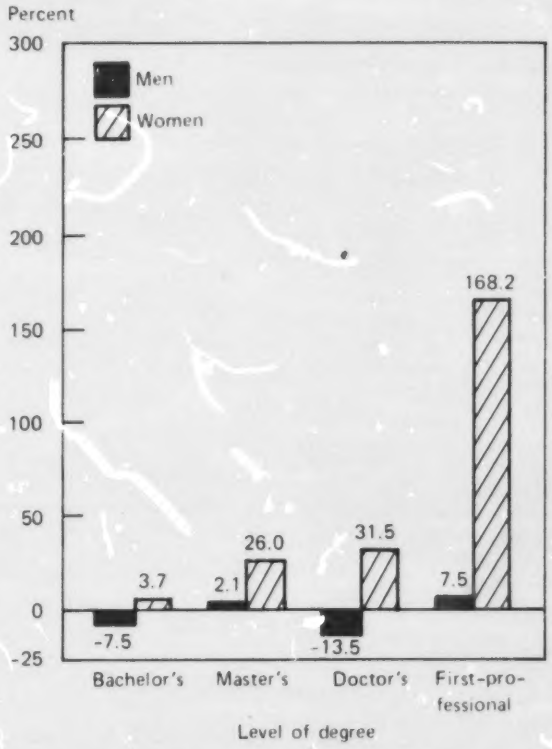


Considering the percent changes, by level of degree and by sex from 1976-77 to 1977-78 (see tables 1 and B), it can be seen that women showed increases at all levels, the largest (19.0 percent) for first-professional degrees. There were declines in all levels for men.

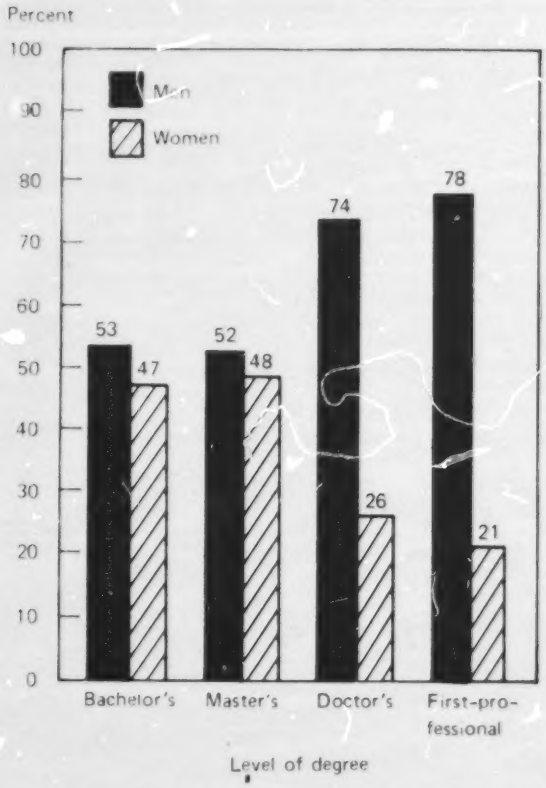
Over 600,000 women were awarded degrees in 1977-78. This represents a 10.4 percent increase over the number awarded in 1973-74. The number of degrees awarded to men declined by 4.8 percent for the same period of time. The largest increase in the number of degrees awarded to women since 1973-74 occurred for the first-professional degrees, which increased by 168.2 percent (see table 1 and chart 2).

However, even though women had higher rates of increase at all levels of degrees than men, they were still only approaching parity with men at the bachelor's and master's levels, and were still lagging behind men in the number and percent of degrees awarded at the first-professional and doctor's levels (see tables 1 and C and chart 3). More than four times as many men received first-professional degrees as women, almost three times as many received doctor's degrees, as women, in 1977-78.

Table C.— Percent of degrees conferred within each level of degree, by sex of recipient and level of degree, 1976-77 and 1977-78

Level of degree	Percent within each level			
	1976-77		1977-78	
	Men	Women	Men	Women
All levels	55	45	54	46
Bachelor's	54	46	53	47
First-professional .	81	19	78	22
Master's	53	47	52	48
Doctor's	76	24	74	26

Chart 3.--Percent of degrees conferred, by sex of recipient and level of degree, 1977-78



The numbers of degrees conferred in 1977-78 by level of degree and sex of recipient, and by control and level of institution, are shown in table 2. Comparison of the 1977-78 data with those of the previous year shows that the percent of degrees conferred by *publicly* controlled institutions changed slightly at the bachelor's and master's levels, (see table D).

The States with the highest number of bachelor's and higher degrees conferred by *publicly* controlled institutions of higher education in 1977-78 were California (83,469), New York (53,661), and Texas (57,872) (see table 3A). The States with the highest number of bachelor's and higher degrees conferred by privately controlled institutions of higher education in 1976-77 were New York (75,653), California (44,407), Massachusetts (41,239), and Pennsylvania (34,405) (see table 3B). When the number of such degrees conferred by privately controlled institutions is considered as a percentage of the total number of such degrees awarded, public and private combined, the range is from 0 percent (Alaska, Wyoming, Canal Zone, Guam, and Virgin Islands) to highs of 94 percent (District of Columbia) 71 percent (Massachusetts), 58 percent (New York), and 51 percent (Vermont) (see table E).

Table D.--Percent of degrees conferred by *publicly* controlled institutional units, by level of degree, 1976-77 and 1977-78

Level of degree	Percent within each level	
	1976-77	1977-78
All levels	66	66
Bachelor's	69	68
First-professional	41	41
Master's	66	65
Doctor's	64	64

The three discipline divisions with the largest numbers of bachelor's degrees conferred in 1977-78 remained unchanged. The only increase was in business and management (see table F).

As in the previous year, the three discipline divisions with the largest numbers of master's degrees conferred in 1977-78 were education, business and management, and public affairs and services (see tables G and 4).

The largest numbers of doctor's degrees awarded in academic year 1977-78 were conferred in education, social sciences, biological sciences and physical sciences (see tables H and 4).

A more detailed presentation of bachelor's, master's, and doctor's degrees conferred by institutions of higher education, by sex of recipient, for academic year 1977-78, is shown in table 5, wherein the data are given for each discipline specialty as well as each discipline division, by control of institution.

Information is presented for each discipline specialty for first-professional degrees, by sex of recipient and control of institution, for 1977-78 in table 6.

Table E.--Percent of total number of bachelor's, first-professional, master's and doctor's degrees conferred by publicly and privately controlled institutional units, by State or other area, 1977-78

State or other area	Percent		State or other area	Percent

Table H.--Number and percent of doctor's degrees conferred in the four largest discipline divisions, 1976-77 and 1977-78

Discipline division	Doctor's degrees awarded			
	Number		Percent of all doctor's degrees	
	1976-77	1977-78	1976-77	1977-78
Education	7,955	7,586	24	24
Social sciences	3,784	3,583	11	11
Biological sciences	3,403	3,313	10	10
Physical sciences	3,344	3,137	10	10

As noted earlier, the most dramatic increase over the previous year in degrees awarded by institutions of higher education occurred at the first-professional level, for women. Table I shows the number of such degrees conferred in 1977-78 by sex and the percent changes over 1976-77. The number of women awarded first-professional degrees increased substantially in 1977-78 in all specialties. The number of degrees awarded to men decreased in 2 specialties in 1977-78 as compared to decreases in 5 specialties in 1976-77.

The number of intermediate degrees conferred by institutions of higher education is shown in table 11, by type of award and control and level of institution.

Table I.--Number and percent change of first-professional degrees conferred by institutions of higher education, by sex of recipient and discipline specialty: Aggregate United States, 1976-77 and 1977-78

Ten-Year Summary 1967-68 — 1977-78

Bachelor's and Higher Degrees

The number of women awarded bachelor's and higher degrees increased (78 percent) from 345,068 in 1967-68 to 613,141 in 1977-78 while in the same period degrees awarded to men increased only 39 percent from 526,764 in 1967-68 to 728,996 in 1977-78 (see table J). It is interesting to note than men as a percentage of the total has decreased steadily each year of that ten year span from 60.4 percent to 54.3 percent while the percentage of women in the total has increased from 39.6 percent to 45.7 percent. See table K for annual changes in the number and percent of bachelors and higher degrees over these years.

Bachelor's Degrees

Women who received bachelor's degrees, increased 58 percent from 1967-68 (277,116) to 439,135, while the number of men increased 37 percent (from 359,747 to 491,066) see table L. The percent of such degrees awarded to women increased from 43.5 percent in 1967-68 to almost one-half (47.2 percent) in 1977-78. See table M for annual changes in the number and percent of bachelor's degrees over these years.

Master's Degrees

The number of women awarded master's degrees in 1977-78 (151,108), was almost three times the number awarded in 1967-68 (63,401), while the number of men awarded master's degrees in 1977-78 (161,708), was about two-thirds greater than in 1966-67 (103,179) (see table N). The percent of such degrees awarded to women increased from 35.8 percent in 1967-68 to 48.3 percent in 1977-78. See table O for annual changes in the number and percent of master's degrees over these years.

Table N.--Number and percent of master's degrees conferred by institutions of higher education, by sex: Aggregate United States, 1967-68 to 1977-78

Doctor's Degrees

The number of women who received doctor's degrees in 1977-78 (8,487) was more than three times the number who received such degrees in 1967-68 (2,906), while the number of men who received doctor's degrees in 1977-78 (23,660) was approximately one-third greater than in 1967-68 (20,185) (see table P). The percent of doctor's degrees awarded to women increased from 12.6 percent in 1967-68 to 26.4 percent in 1977-78 -- more than doubling in this period of time. See table Q for annual changes in the number and percent of doctor's degrees over these years.

Table P.--Number and percent of doctor's degrees conferred by institutions of higher education, by sex: Aggregate United States, 1967-68 to 1977-78

First-Professional Degrees

The number of women awarded first-professional degrees in 1977-78 (14,411) increased 876 percent over the number awarded such degrees in 1967-68 (1,645), while the number of men awarded these degrees in 1977-78 (52,553) increased only 59 percent over the number in 1967-68 (33,083) (see table R). The percent of first-professional degrees awarded to women more than quadrupled from 4.7 percent in 1967-68 to 21.5 percent in 1976-77. See table S for annual changes in the number and percent of first-professional degrees over these years.

Of the 1,882 institutional units reporting degrees conferred, 590 of these awarded first-professional degrees. Some of these units are separate institutions and grant only the first-professional degree. Others are branches of universities which may or may not grant all four levels of degrees. See table T for number of first-professional schools.

Table R.--Number and percent of first-professional degrees conferred by institutions of higher education, by sex: Aggregate United States, 1967-68 to 1977-78

Detailed Tables

The eleven detailed tables in this report for 1977-78 contain what the author believes to be the most comprehensive and useful groupings of the data within the constraints of publication. The tables are comparable to and use the formats of, reports of previous years.

Table 1 is a comparison of the number and percent change of degrees conferred, by level of degree, for the five academic years from 1973-74 through 1977-78. Table 2 is a summary of the degrees conferred in 1977-78 by sex and level of degree, as well as by control and level of institution. Tables 3, 3A, and 3B show State data for each of the degree levels, by sex of student and by control of institution. Table 4 presents bachelor's, master's, and doctor's degrees awarded, by sex and by discipline division. Table 5 shows bachelor's, master's, and doctor's degrees awarded, by sex and by discipline specialty within each discipline division. Table 6 presents data on first-professional degrees conferred in twelve discipline specialties, by sex and control of institution.

Tables 7, 7A, and 7B present data on the number and percent change of bachelor's degrees conferred for the five academic years from 1973-74 through 1977-78, by sex, by discipline division, and by control of institution. Tables 8, 8A, and 8B do the same for master's degrees, and tables 9, 9A and 9B do the same for doctor's degrees. Tables 10, 10A and 10B show data on the number and percent change of first-professional degrees conferred for the five academic years 1973-74 through 1977-78 by sex, by discipline specialty, and by control of institution. Table 11 summarizes intermediate degrees conferred in 1977-78 by control and level of institution.

Detailed Tables

TABLE 1.--BACHELOR'S AND HIGHER DEGREES CONFERRED IN INSTITUTIONS OF HIGHER EDUCATION1/, BY LEVEL OF DEGREE AND SEX OF STUDENT: AGGREGATE UNITED STATES, 1973-74 TO 1977-78 2/

LEVEL OF DEGREE AND SEX OF STUDENT	1973-74	1974-75		1975-76		1976-77		1977-78		PERCENT CHANGE, 1973-74 TO 1977-78
	NUMBER	NUMBER	PERCENT CHANGE FROM 1973-74	NUMBER	PERCENT CHANGE FROM 1974-75	NUMBER	PERCENT CHANGE FROM 1975-76	NUMBER	PERCENT CHANGE FROM 1976-77

1/ AN INTERMEDIATE DEGREE IS ANY RECOGNITION (DEGREE OR CERTIFICATE) FOR A PROGRAM INTERMEDIATE BETWEEN THE MASTER'S DEGREE AND THE DOCTOR'S DEGREE (PH.D., ED.D., ETC.), WHICH IN ESSENCE IS THE DOCTOR'S DEGREE WITHOUT THE DISSERTATION. FOR EXAMPLE, MASTER OF PHILOSOPHY, CANDIDATE IN PHILOSOPHY, DOCTOR OF ARTS, ETC.

Appendix
Reproduction of Survey, Form Instructions, Parts A and B

INSTITUTION	1. INSTITUTION CODE NUMBER

INSTRUCTIONS FOR PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS, 1977-78

Only the 10 professions listed below should be reported in Part A. Within these professions, report **first-professional** degrees only. A first-professional degree is defined herein as one which meets all three of the following criteria:

(1) it signifies completion of the academic requirements to begin practice in the profession; (2) it is based on a program which requires at least 2 years of college work prior to entrance; and (3) a total of at least 6 academic years of college work is required to complete the degree program, including prior required college work plus the length of the professional curriculum itself.

The "Other" category is to be used only in the event that there are first-professional degrees within the 10 professions other than those specifically named in connection with those professions.

For each of the 10 disciplines, degrees other than first-professional are to be reported in Part B.

The TOTAL line (line 14) should show the sums of the entries in each discipline in columns 4 and 5.

PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS *(Requiring at least six years of study)*

(Detailed portions of Part A have been deleted and only discipline specialties and respective codes are shown here.)

1204	Dentistry
1206	Medicine
1209-1	Optometry
1210	Osteopathic medicine
1211-1	Pharmacy
1216-1	Podiatry
1218	Veterinary medicine
1221-1	Chiropractic
1401-1	Law, general
2301-1	Theological professions, general
9799	Other

INSTRUCTIONS FOR PART B: BACHELOR'S, MASTER'S, AND DOCTOR'S DEGREES

1. **TYPES OF DEGREES.** Report **earned** bachelor's, master's, and doctor's degrees, except for those first-professional degrees reported in Part A. Report certificates and diplomas if they are equivalent to a bachelor's degree and if they are based on at least 4 years of college work.

Do **not** report honorary degrees.

Certificates for work between the master's degree and the doctor's degree should be separately listed at the end of Part B. See 5(d) below.

(Report Associate in Arts degrees or similar awards below the bachelor's level in Part C.)

2. **GROUPING OF DISCIPLINES.** The major fields of study to be reported here fall in the following discipline divisions:

0100 Agriculture and Natural Resources
0200 Architecture and Environmental Design
0300 Area Studies
0400 Biological Sciences
0500 Business and Management
0600 Communications
0700 Computer and Information Sciences
0800 Education
0900 Engineering
1000 Fine and Applied Arts
1100 Foreign Languages
1200 Health Professions
1300 Home Economics
1400 Law
1500 Letters
1600 Library Science
1700 Mathematics
1800 Military Sciences
1900 Physical Sciences
2000 Psychology
2100 Public Affairs and Services
2200 Social Sciences
2300 Theology
4900 Interdisciplinary Studies

3. **SKIPPING INAPPLICABLE DISCIPLINES.** Skip those discipline divisions for which your institution does not grant degrees. Please indicate by circling the appropriate page number in the "contents" the discipline divisions in which your institution awarded degrees.

4. **NUMBER OF DEGREES.** Report all degrees (within the limitations of paragraph 1, above). If a student earned two degrees between July 1, 1977 and June 30, 1978 *(e.g.,* a bachelor's degree at the end of the summer session and a master's degree at the end of the following academic year), report each of the two degrees in its appropriate classification.

5. **DEGREE LEVELS.**

(a) Report all **BACHELOR'S DEGREES** requiring at least 4 but not more than 5 years of academic work in Columns (4) and (5) of the report-form. Also, report **ALL** bachelor's degrees conferred in a **COOPERATIVE** or **WORK-STUDY PLAN** or **PROGRAM** in Columns (4) and (5). A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with his college studies.

(b) **MASTER'S DEGREES.** The master's degree in liberal arts and sciences is the degree customarily granted upon successful completion of one *(sometimes two)* academic years of work beyond the bachelor's degree.

Except for the Master of Divinity degree (Part A), report all master's degrees in Part B, Columns (6) and (7) *(even though the master's is required in some fields, such as Library Science, Hospital Administration, and Social Work, for employment at the professional level, and even though, as in the case of Social Work, 4 years of undergraduate work are required for entrance into the program and an additional 2 years for completion.)* Report Education specialist (6-year degree) in same columns as master's degrees, in appropriate discipline specialty in Education (0800).

(c) **DOCTORATE.** The doctorate classification includes such **degrees as** Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field whether Agronomy, Food Technology, Education, Engineering, Public Administration, Ophthalmology, Radiology, etc. *(In the case of the Doctor of Public Health, the prior professional degree is generally earned in the closely related professional field of medicine or of sanitary engineering.)* **Please** report the doctor's degrees *(except those included in Part A)* in Columns **(8)** and (9) of the report-form.

(d) **INTERMEDIATE DEGREE OR CERTIFICATE.** If your institution provides any recognition *(degree or certificate)* for a program intermediate between the master's degree and the doctor's degree *(Ph.D., Ed.D., etc)* which in essence is the doctor's degree without the dissertation *(for example, Master of Philosophy, Canidate-in Philosophy, etc.) (do not include 6-year specialist degrees)*, please report the name of the degree or certificate and the number of students receiving it in the item at the end of Part B *(after Item No. 9800). (Do not include in the tabulated figures for Bachelor's, Master's, and Doctor's degrees in the report form.)*

6. **CLASSIFICATION OF DEGREES ACCORDING TO MAJOR FIELD OF STUDY**

(a) **Specific Classification.** Classify degrees as specifically as the list of specialties in the broad discipline divisions of the report form permits. Thus, report a bachelor's degree in business administration with an accounting major in Accounting (0502), NOT in Business and commerce, general (0501).

(b) **Degree of Doctor of Philosophy.** Classify the Doctor of Philosophy degree according to the student's major field of study. Thus, a Ph.D. in Chemistry should be reported as a degree in Chemistry, NOT as one in Philosophy.

(c) **Majors of Students Prepared to Teach.** The general rule is to classify degrees according to the major area of specialization. This means, in general, that degrees of students who have prepared to teach an academic subject, such as English, biology, or foreign languages, should be reported respectively in Letters, Biological Sciences, and Foreign Languages and NOT in Education. On the other hand, the degrees of students who have prepared to teach such special subjects as agriculture, art, music, etc. should be reported in Agricultural education (0899-1, Art education (0831), and Music education (0832).

(d) **Split major.** When a student graduates with a split major, report the degree in the area of greater specialization, if possible. If this is not possible, the degree should be reported in the discipline specialty closest to the combination. If a split major involves two languages, report it in 1101, Foreign languages, general. Similarly, within each of the other discipline divisions, if a split major involves two specialties within a division, the degree should be reported under the appropriate "general" specialty indicated under that discipline heading. For example, a major in history and political science should be reported under 2201, Social sciences, general. If the split major covers more than one discipline division, the degree should be reported in the area of greater specialization. DO NOT REPORT FRACTIONS OF A DEGREE.

(e) **Double majors.** When a student graduates with a major in two discipline specialties, report the degree in the field in which the degree was awarded. If the student received two degrees, report only one – in the field of greater specialization, if possible.

(f) **Unlisted Fields of Study.** When classifying a specialty which does not seem to fit into the list, the institution has two choices: (a) the specialty can be listed by name under "other" if it represents an

unlisted specialty, or (2) it can be placed in a "general" category if it covers several listed specialities. Do NOT erase or change any titles of discipline specialties.

Discipline specialties are coded by number. Keypunching is done according to code number and any manual name change would result in improper coding.

(g) **General Majors.** The term general major is used to designate diversified curriculums within an area of study. Ordinarily, degrees based on a general major should be reported in one of the general categories of the report-form, such as Physical sciences, general (1901); Social sciences, general (2201); Humanities and social sciences (4903), etc. Thus a degree based on concentration in History-Government-Economics should be reported in Social sciences, general.

(h) **Interdisciplinary Studies.** The code in the 4900 group *(See page 39)* are for reporting fields of study which represent two or more broad dicipline divisions. Specify the name of the interdisciplinary study when reporting in 4999.

(i) Before submission, please verify that the specialty subtotals (for examples, lines 22, 33, and 52, etc.) are the sum of the specified preceding lines for every column (colums (4) through (9).

*U.S. GOVERNMENT PRINTING OFFICE: 1980-0-721-697/246
